

# EXPECT MORE UNDER DROUGHT CONDITIONS

Crops/Plants under a regular **Nature's Wonder® APEX-10™** maintenance program have been proven to maintain quality with up to 30% less irrigation.

*Whether the period of drought is expected to come and go this season or such conditions are now considered your "new normal", you can reduce the impact on your crops/plants with the ultimate soil, crop & plant health technology, **Nature's Wonder® APEX-10™**. This revolutionary product is a 3-in-1 organic & sustainable climate smart solution produced from 10,000 year old, naturally occurring materials utilizing a unique proprietary process. APEX-10™ is available in a liquid formulation to apply by a spray device.*

**Enhance fertilizer and water efficiency** by increasing crop/plant chlorophyll levels and accelerating crop/plant metabolic performance.

**Increase crop/plant turgidity** improving the crop/plant ability to move water more efficiently.

**Enhance soil nutrient retention and make nutrients more available to the crop/plant** by enhancing the growth of the native microbial population and its activity.

**Dramatically reduce potential of root loss under stressful conditions** by increasing root mass, density, and strength.
