

APEX-10

GENERAL INFORMATION

The contents of this material are Activated Peat Humic Substances of natural brown polymeric product from highly humified organic vegetation.

This combination of the natural polymers contains aromatic phenol groups, heterocyclic structures, hydroxy groups, long chained and short-chained polysaccharides.

AGROCHEMICAL COMPATIBILITY

Apex-10 can be tank mixed with most liquid soil, foliar & acid fertilizers, most pesticides, and fungicides, always check manufacturer's recommendations before mixing.

Do not mix Apex-10 with any herbicide. This will increase the weakening of the untargeted plant causing increased stress to the plant.

Apex-10 is screened at 200 mesh prior to packaging and the low pH formulation allows it to be used in acid or alkaline systems without gelling, precipitating, or what otherwise might prevent the mixing of Ag-chemicals prior to application.

From the Earth...For the Earth

CAUTION

Do not ingest. If contact with skin or clothes wash with soap & water, may cause irritation to nose, throat or skin. In case of eye contact wash with water for 15 minutes. If swallowed induce vomiting. Immediately seek medical attention if any ailments persist.

SHAKE & STIR WELL BEFORE EACH USE

APPLICATION RATES

Cool Season Golf & Sports Turf: Apply 1.5 oz per 1000 sq. ft every 14 days or 3.0 oz. per 1000 sq. ft. every 30 days during the season.

Cool Season Residential Turf: Apply 3.0 oz per 1000 sq. ft. April, June, August, and October.

Warm Season Golf & Sports Turf: Apply 2.5 oz per 1000 sq. ft. every 14 days or 5.0 oz. per 1000 sq. ft. every 30 days during the season.

Warm Season Residential Turf: Apply 5.0 oz per 1000 sq. ft. April, June, August, and October.

Sod: Spray soil prior to laying sod at rates for cool & warm season turf and continue for the season.

Weed: Spray after seeding at 1.5 oz per 1000 sq. ft. or soak seed in 1qt. per 100 gallons of water.

Foliar & Transplant: Use 1 quart in 500 gallons of water. Spray root ball. Spray plant to run off.

Trees, Shrubs, & Vines: Apply in the spring and fall using 1 gallon to 100 gallons of water. Thoroughly wet leaves, stem, and base.

Row Crops: Use 2 quarts per acre. Apply with foliar nutrients to both sides at base of crops.

Drip & Sprinkler Irrigation: Dilute 2 quarts in 10 quarts of water. Inject diluted mixture at the rate of 2.5 gallons per acre. Maintain agitation in tank.

Vegetable Gardens: Mix (1) teaspoon in each gallon of water. Dip roots of plant in solution. Apply same rate as a foliar spray 14 days prior to plants blooming.

House Plants: Mix (1) teaspoon in each gallon of water, apply every 30 days.

Never spray when extended periods of extreme summer heat and drought conditions exist, spray after conditions pass to accelerate recovery, for best results spray three times before conditions prevail.
